ambiente®

Upgrade information on program version 6.5

October 2009

ANOVA MULTIMEDIA STUDIOS

Installation directions:

Please do always save your old program data before installing upgrades or updates.
You can do this at *„functions/properties/save data"*.
Our Hotline is available for you from monday to friday, from 8 a.m. to 5 p.m.

The following program supplements, enhancements and requirement conformances are newly contained by ambiente® 6.5 in contrast to the previous version 6.0:

➢ **NEW! Module 3D Wall:**
The new module **3D Wall** makes a detailed planning of the walls possible. Like in the module 3D Floor single walls of a certain room can be decorated with different articles and devided into several areas. This makes different materials on one wall possible. In addition wall coverings and bordures can be visualized. The material groups can vary from colour to tiles, panels and wallpapers. Just like in the module 3D Floor the module 3D Wall displays consumptions and cuttings for every area.

➢ **General program functions**
- Revised update function of a self-executing installation
- Program manual can be called via the „F1" key.
- Possibility to save notes on model decorations
- Possibility to search articles of all manufacturers at the same time
- Remote maintenance callable from within ambiente®.

➢ **3D WINDOW DECORATION**
- simplified customer's image for frontal pictures in the window front type „one wall"
- **NEW:** wall and floor can be decorated inside the customer's image.
- Half-automatic function for masking out the foreground in a customer's image
- Possibility of changing/adding/deleting masks in the customer's image after decoration
- fixing techniques (curtain pole, track, rope) freely measure- and positionable
- all decorateable objects are selectable via mouse click
- display, positioning and colouring of window handles

➢ **Image design**
- 11 new basic images available (upholstery and seating areas)
- all decorateable objects are selectable via mouse click

➢ **Calculation**
- New key shortcuts ([ALT]+[W]) for „new decoration"
- Position list transfer from Interstil interface
- Handmade pleats included
